

Resource audit

Optional practice | Proposed 25 minutes | Individual worksheet

Elena finds a leaking tap, wrong-version handouts and supplies reordered because they cannot be found.
Record three distinct observations. Check evidence before claiming savings.

Name / Pangalan: _____ Date / Petsa: _____

Water: observation / evidence to check / safe next step / person to tell

Paper: observation / evidence to check / safe next step / person to tell

Supplies or time: observation / evidence to check / safe next step / person to tell

Safety and quality check: Show how a label, stock count and approved-version check prevent a duplicate order.
Never use expired stock or outdated handouts merely to save resources.

My reason / Dahilan:

Private facilitator record: Facilitator observation (separate from participation): Did this learner provide evidence and a safe next step for all three rows? What needs another attempt?

Observed action / Nakita:

Next practice / Susunod na pagsasanay:

Audit ng resources

Optional practice | Proposed 25 minutes | Individual worksheet

May tumutulong gripo, maling bersyon ng handout, at muling nabibiling gamit dahil hindi makita sa BHS ni Elena. Itala ang tatlong magkaibang obserbasyon. Suriin ang ebidensya bago sabihing may natipid.

Name / Pangalan: _____ Date / Petsa: _____

Tubig: obserbasyon / ebidensyang susuriin / ligtas na hakbang / pagsasabihan

Papel: obserbasyon / ebidensyang susuriin / ligtas na hakbang / pagsasabihan

Gamit o oras: obserbasyon / ebidensyang susuriin / ligtas na hakbang / pagsasabihan

Safety and quality check: Ipakita kung paano maiiwasan ang dobleng order sa label, bilang ng stock at aprubadong bersyon. Huwag gumamit ng expired na stock o lumang handout para lang makatipid.

My reason / Dahilan:

Private facilitator record: Obserbasyon ng facilitator (hiwalay sa pagsali): May ebidensya at ligtas na hakbang ba sa tatlong hanay? Ano ang kailangang ulitin?

Observed action / Nakita:

Next practice / Susunod na pagsasanay:

Safe-change decision

Optional practice | Proposed 25 minutes | Individual worksheet

Compare two choices: repair the leak versus reduce handwashing water; reusable teaching visual versus reuse of a clinical single-use item. Explain why one option in each pair must be rejected.

Name / Pangalan: _____ Date / Petsa: _____

Choice 1: likely saving / possible harm / protected service / decision

Choice 2: likely saving / possible harm / protected service / decision

Wrong printouts: two possible causes / evidence / approved-master check

Safety and quality check: Protect hand hygiene, clinical single-use rules, cold-chain equipment, urgent referral and service quality. Check local policy with the supervisor before changing a routine.

My reason / Dahilan:

Private facilitator record: Facilitator observation (separate from participation): Did this learner validate a cause and explain a safeguard and rejected unsafe option?

Observed action / Nakita:

Next practice / Susunod na pagsasanay:

Ligtas na pagbabago

Optional practice | Proposed 25 minutes | Individual worksheet

Ihambing ang dalawang pagpili: ayusin ang tagas o bawasan ang tubig sa paghuhugas ng kamay; reusable na teaching visual o muling paggamit ng clinical single-use item. Ipaliwanag kung bakit may opsyong dapat tanggihan sa bawat pares.

Name / Pangalan: _____ Date / Petsa: _____

Pagpili 1: posibleng tipid / pinsala / serbisyong protektado / pasya

Pagpili 2: posibleng tipid / pinsala / serbisyong protektado / pasya

Maling printout: dalawang posibleng sanhi / ebidensya / approved-master check

Safety and quality check: Protektahan ang hand hygiene, clinical single-use rules, cold chain, agarang referral at kalidad ng serbisyo. Suriin muna ang lokal na policy kasama ang supervisor.

My reason / Dahilan:

Private facilitator record: Obserbasyon ng facilitator (hiwalay sa pagsali): Natiyak ba ang sanhi at naipaliwanag ang proteksyon at tinanggihang di-ligtas na opsyon?

Observed action / Nakita:

Next practice / Susunod na pagsasanay:

Monitor a resource trial

Optional practice | Proposed 30 minutes | Individual worksheet

Fictional data: wrong-version reprints are 20 of 100 pages before a checklist and 5 of 100 after. Calculate the two rates and change. Check whether the work and service quality remained comparable.

Name / Pangalan: _____ Date / Petsa: _____

Before: numerator / denominator / percentage

After: numerator / denominator / percentage

Change per 100 pages / session workload / correct materials and delays

Owner / colleague feedback / handover / review date / continue, revise or stop

Safety and quality check: A raw total alone cannot show improvement when the number of teaching sessions changes. No patient names are needed. Expected fictional result: 20% to 5%, down 15 percentage points.
My reason / Dahilan:

Private facilitator record: Facilitator observation (separate from participation): Did this learner calculate correctly, check quality and workload, and respond to feedback?
Observed action / Nakita:

Next practice / Susunod na pagsasanay:

Subaybayan ang trial

Optional practice | Proposed 30 minutes | Individual worksheet

Kathang datos: 20 sa 100 pahina ang maling-bersyong reprint bago ang checklist at 5 sa 100 pagkatapos. Kwentahin ang dalawang rate at pagbabago. Suriin kung maihahambing ang gawain at napanatili ang kalidad ng serbisyo.

Name / Pangalan: _____ Date / Petsa: _____

Dati: bilang / kabuuan / porsiyento

Pagkatapos: bilang / kabuuan / porsiyento

Pagbabago bawat 100 pahina / dami ng session / tamang materyal at delay

Responsible / puna ng kasama / handover / petsa ng review / ituloy, baguhin o ihinto

Safety and quality check: Hindi sapat ang raw total kung nagbago ang dami ng teaching session. Hindi kailangan ang pangalan ng pasyente. Inaasahang resulta sa kathang datos: 20% tungong 5%, bawas na 15 percentage points.

My reason / Dahilan:

Private facilitator record: Obserbasyon ng facilitator (hiwalay sa pagsali): Tama ba ang kwenta, nasuri ang kalidad at workload, at natugunan ang puna?

Observed action / Nakita:

Next practice / Susunod na pagsasanay:
